PROJECT AND MAINTENANCE SOLUTIONS

Progressive Client and Contractor Teams

Progressive Client and Contractor Teams

Our sincere and holistic approach offers a singular point of accountability for the entirety of the project, from concept to close out Optimising the commercial, technical and performance aspects of our client projects.

We remain committed to delivering professional solutions that are proactive and responsive, and achieved through sustained client and contractor partnerships.

Effectively managing project risk and opportunities whilst remaining focused on the best and predictable outcome for our client's projects.

EPCM SOLUTIONS FOR WA RESOURCES AND DEFENCE INFRASTRUCTURE

Specialising in providing EPCM solutions for the smaller brownfield construction and maintenance projects, Pertama's expertise is focused on providing nimble and responsive project solutions packaged to suit individual client requirements.

Our industry experience in delivering EPCM solutions, and that of our specialised contractors, in addition to our collaborative client-team approach, ensures that we remain focused on mitigating project risks. This approach to optimised project delivery ensures a predictable outcome whilst minimising asset shutdown time.

WHY CHOOSE PERTAMA?

A Pertama delivered project will ensure that:

- Project delivery is highly responsive and reactive to changing project dynamics.
- Clients have a single point of accountability throughout the entire project
- A focus remains on mitigating project risk.
- The project planning, execution and outcomes are predictable at every stage.
- Clients have access to highly experienced and specialised project delivery personnel.
- We work collaboratively with our clients and together achieve the best project outcome.
- We maintain a proficient, efficient and optimised project execution, every time.

Supporting the Resources Sector

Our primary objective is to offer asset owners a singular point of accountability from concept, design, development through to execution and ongoing maintenance.

Service Portfolio

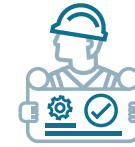

ENGINEERING, PROCUREMENT, CONSTRUCTION AND MAINTENANCE (EPCM)

Pertama's engineering, procurement, construction and maintenance provides a single-source capability including, brownfields structural integrity and sustaining capital repair and upgrade services.

All of which is undertaken through collaborative client-contractor consultation with the asset owners, to ensure that your asset continues to operate at optimal performance.

Project and Maintenance Engineering and Management

Part of Pertama's core service offering is Project and Maintenance Engineering and Management. This service is intended to supplement and work with our client's teams during peak times, or in preparation for major events such as shutdowns or construction projects.

These can be short-term or fixed-term contract-based roles where the resource can be switched on or off as required. The range of roles offered are:

- Project Management
- Project Controls
- Engineers
- Planner/Schedulers
- Work-pack Engineers
- Supervisors & Superintendents

Supporting the Defence Sector

Service Portfolio

Fabrication Services

Pertama can tailor fabrication solutions to suit project requirements and provide cost-effective solutions for any project and maintenance application.

Our Fabrication capabilities include:

- Structural steel and platework – Stick Steel and Modulised
- Piping – Spools, Pipe racks, etc.
- Materials handling - Conveyor systems, galvanised and stainless steel components
- Pressure vessels and storage tanks
- Handrails, gratings, etc.
- Ducting
- Mechanical & electrical integration
- Specialised Welding

For larger scale fabrication projects, Pertama has an arrangement in place with an engineering and fabrication provider in Thailand to provide cost-effective fabrication solutions without compromising on quality.

Blue Collar Project and Maintenance Labour

Within an individual project scope and remit, we can supply the required specialist blue collar roles to deliver any Structural, Mechanical and Piping (SMP) project, including shutdown maintenance work.

The range of blue-collar roles we are able to provide are:

- Coded Welders
- Boiler Makers
- Pipe Fitters
- Fitters
- Riggers
- Trade Assistants

We pride ourselves on doing things differently. By applying a professional approach to our business and client projects, our holistic capability to project maintenance focusses on client collaboration, and together as a team we achieve the best possible outcome.
